Progress Report: Group 2

So far we have all researched our topic and shared what sites we found from the web. After meeting with everyone we broke down tasks for each person to further investigate. One person is looking farther into the side of Indian Point. The other two group members are doing research against Indian Point. With the members doing research against, they split that up into views of recommendations and then decisions leading to the problem. When the information is collected another meeting will be held to put all the information together for a final project.
